5. B.Sc. in Dental Operating Room Assistant

Aim of the Course: the course aims to produce caring, knowledgeable, competent and skilful professionals, who are above to accept professional responsibility for their contribution to the effective and safe care of patients. These professionals will appreciate the need for continuing professional development and apply advances in relevant knowledge throughout their career.

6. B.Sc. in Dental Hygiene

Aim of the Course: the course aims to produce caring, knowledgeable, competent and skilful professionals, who are above to accept professional responsibility for their contribution to the effective and safe care of patients. These professionals will appreciate the need for continuing professional development and apply advances in relevant knowledge throughout their career.

7. B.Sc. in Operation Theatre Technology

The course has been planned to upgrade the standard for the hospital operating theatre assistant. The students who have passed 10+2 schooling or equivalent to that or who are already working in the OT are planned to receive training. Very few Government hospitals in our country have got the facility for this course

The proposed training in this field will enable them to learn systematically the theoretical and practical aspects of operating room techniques and enable us to select trained technicians in this field. It has become essential as very highly technology-oriented equipment of different types like anaesthesia machines & monitors, pain management devices, and other surgical equipment are commonly used in the modern operation theatre and ICU.

SCOPE:

- i. The Course prepares the operating theatre technologist to work as a competent and reliable member of the health care team who can work harmoniously with doctors, nursing and other health care support staff for effective delivery of patient care.
- ii. Training also focuses on the knowledge and skills of monitoring infection control policy and procedures in the operating theatre.
- iii. This programme prepares individuals to assist anaesthesiologists, and surgeons in developing and implementing patient anaesthesia care plans, including preoperative, operation theatre, recovery room, post-operative care, intensive care procedures and pain interventions procedures.
- iv. The program is intended to equip the candidates in modern day operation room technology including patient data collection and adherence to safety check lists, communication and soft skills, ethics, safe transfer of patient, in and out of operation theatre.
- v. The candidate will be trained for preoperative management includes patient data collection, airway management, assisting the administration and monitoring of regional and peripheral nerve blockades, support therapy, adjusting anaesthetic levels during surgery, inter-operative monitoring, postoperative procedures, pain clinics and patient education.
- vi. Course will also prepare candidate to provide the anaesthesia support services & surgical care basics like manifold system, central sterilization system, installation, maintenance, basic care and troubleshooting of various electrosurgical devices, laparoscopic, endoscopic and robotic instruments, basic asepsis, wound care and dressing, common surgical procedures like catheterization, chest and abdominal drainage, basic knowledge of common surgical instruments and suture materials, safe use and disposal of sharps, universal precautions, biomedical waste management and administrative tasks.

Instruction for preparing digital image of thumb print

Taking a thumb-print

1. Draw a box of 4 cm x 3 cm (width x height) on a white sheet of paper (you may draw more than 1 box to take multiple thumb print and select the best).
2. Use a fresh blue/black colour ink pad.
3. Practice on a sheet of paper to get the proper thumb-print especially the density or darkness of the colour. The impression of the print should be clear and readable; neither dark nor smudged or light.
4. Clean your hands and dry them before you begin (oil/dirt can obscure the prints).
5. Gently press your **LEFT THUMB** against the ink pad and take a horizontal print of your left thumb within the box. Do not press too much or wriggle as it may lead to smudging of print. Preferably take impressions of thumb in more than box.

Preparing digital image of thumb-print using a digital device (camera/smart phone etc)

1. **Clicking image of thumb-print using a digital device.**
 - a. Click the image in **bright light conditions** using any digital device (preferably with > 5-megapixel resolution). Avoid using flash.
 - b. Check the shadow of your hands/camera/smart phone etc. does not fall on the sheet.
 - c. Click the image and check that it is not blurred due to low light conditions or shaking of hands.

3. **Editing digital image of the thumb-print**
 - a. Transfer the digital image to a computer/laptop.
 - b. If required, use **auto-correct feature** of image editing software so that the signature is clear against a white background.
 - c. **Crop** the image such that border of boxes are reached.
 - d. **Resize** the image to 20–100 Kb (maintain aspect ratio, i.e. height and width ratio to avoid distortion of image)

Preparing digital image of thumb-print using a scanner

1. Set the scanner to 200 dpi and scan only the box with signature (**DO NOT** scan the whole sheet)
2. Save the scanned image of thumb-print as .jpg/.jpeg/.gif/.png image.
3. Re-size the image to 20 to 100 Kb. Size of the image can be checked by right click on the image and then go to "Properties" link. ([Click here](#) to know how to resize a scanned image)

Checklist before uploading digital image of thumb-print
